

AMENDMENTS TO THE SPECIFICATION

Please amend the first full paragraph on page 6 as follows:

The means for maintaining the oven around the temperature T_s selected by the user comprise gas flow regulating means that regulate the gas outflow to the burner 1 in accordance with the temperature in the oven and said selected temperature T_s . In the embodiments of figures 1 and 2, the gas flow regulating means comprise a gas thermostat 2 connected to a heat-sensitive element 13 close to burner 1.

A proposed new set of formal drawings is appended hereto.
